

STEP 1

I am delete all working directorys for *DCP-o-matic 2* (incorrectly-named and correctly-named too).

STEP 2

Run *DCP-o-matic 2*.

STEP 3

DCP-o-matic 2 had created 2 paths.

1st path in time 12:41:**44** and incorrectly-named path (see yellow chracters). End directory dcpomatic2 is **always EMPTY**.

C:\Documents and Settings\Bohumír Džubej - BoD\Local Settings\Data aplikací\dcpomatic2

2nd path in time 12:41:**53** (9 sec. later) and correctly-named path (see green characters). End directory dcpomatic2 is **always with file config.xml**.

C:\Documents and Settings\Bohumír Džubej - BoD\Local Settings\Data aplikací\dcpomatic2\config.xml

Why *DCP-o-matic 2* creating 2 paths?
